

MEASURING INSTRUCTIONS

1. Begin with a freehand sketch indicating inside pool dimensions. Include deck area, planters and any obstructions within 3' of the waterline. A photo of the pool is suggested when there are rocks, waterfalls, raised walls, spas, or anything out of the ordinary.
2. Establish two points, "A-B", on the deck area about 2/3 the length of the pool; 20'-25' is typical for residential pools, (show this on the sketch). Use two lawn stakes, ice picks or screwdrivers as points "A & B".

NOTE: The "A-B" line must never intersect the pool line and should be approximately 5' away from the pool at the closest point.

3. Using chalk, mark and number points along the inside edge of the pool at approximately 3' intervals. Number all corner points, ladders, fill spout, dive stand, handrails, grabrails, slide legs, rocks, raised areas, waterfall, planters, spillways, spa walls separating spa and pool, etc. 1' to 2' intervals should be used in small or tight radius areas.
4. Measurements are now taken from "A" to point #1, then point #2, and all the way around the pool. Then measure from point "B" to the same point #1 and then #2; as you did for point "A". Measurements are listed in column form as shown. Measure overall length of pool at water line. Take this measurement using two numbered points on pool.

No. A B

(6" BACK)

*PLANTER

PT 61 TO PT 66

IMPORTANT NOTE: If you have a Straight Rectangular, Grecian, Ell, or Bow End pool, with or without steps, it is not necessary to take A-B measurements. Simply sketch the pool on the enclosed graph paper and provide all perimeter dimensions and the overall length and width. Obstructions can be located by supplying the distance from a corner to the obstruction and the distance into or away from the pool edge.

TO AVOID DELAYS: please answer all questions and send photos to photos@MeycoProducts.com.

All removable obstructions should be removed when cover is in use.

1. Measurements supplied - pool size preferred: POOL SIZE _____ COVER SIZE _____ OTHER (specify) _____

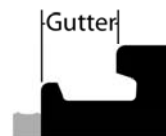

2. The distance from A to B for "A-B" measures: _____

IMPORTANT - show A and B locations on sketch

3. Coping type _____ **Deck type** _____ **Coping size** _____ **Min. Deck Width** _____

Commercial Only: ☐ Skimmer ☐ Gutter Gutter Size _____ (See illustration)

(If no selection is made, we will assume gutter)

4. Did you indicate the radius or approx. amount of curve for any inside or outside corners? ☐ YES ☐ NO

5. Prefer squared off corners? ☐ YES ☐ NO

(4' radius corners are automatically cut. 2'-3' radius corners are automatically squared off.)

6. SPA TREATMENT If Spa is raised please tell us height of spa and how you would like to cover it:

☐ Standard w/Long Straps (anchor into decking) ☐ Super-Flap (12" ht max. Attached to main) ☐ "Cap" Style

☐ Anchor Into Spa Coping ☐ Anchor Into Spa Side Wall

☐ Best Way ☐ No Spa Cover Spa Height _____

7. TROUGH OR CATCH BASIN TREATMENT If you have a Trough / Catch Basin, How do you want it covered?

☐ Attach to Main if Possible ☐ Separate Cover ☐ No Cover At All

8. Does pool have more than 1 deck level? ☐ YES ☐ NO If YES, fill in DECK LEVELS section next page.

9. MULTI-LEVEL DECKS or RAISED AREAS PREFERENCES

☐ If possible use Stepcuts to go on top of Raised Area ☐ Go directly into Raised Area ☐ Best way

(Meyco will make safety the first consideration in the overall design)

10. Special hardware required? ☐ YES - See Cover Sheet ☐ NO

11. Use Pivoting Snap Hook for Wall Application. ☐ YES ☐ NO

Use Pivoting Ring for Wall Application. ☐ YES ☐ NO

(Will snap onto cablemates)

Pivoting Snap Hook

Pivoting Ring
US Patent 7,490,389

12. Photos have been emailed of Waterfalls, Rocks, Multi-level decks or a Very Irregular Pool. ☐ YES ☐ NO
